---

Zolymar,

Thank you for the update and confirming Mr. Serna will respond today.

Regards,

Dan

**\*\* WARNING EXTERNAL SENDER \*\***

Dan,

Mr. Serna has been contacted and he will be at the site later this afternoon to remove the livestock. However, based on the recent events, going forward we may need to keep the gates closed (not locked) to prevent livestock from reentering the Site. Mr. Serna indicated that he would be closing the gate after he removes the livestock.

Regards,

Zolymar Luna Díaz

**Subject:** Proteco: Cattle on Site and Caused Work to Stoppage

Hello Zolymar,

Geosyntec reported that the fence post reinstallation and repair task were completed this afternoon (February 8, 2022) at the Proteco site. Livestock are still present inside the Site fence and need to be removed. Because of the livestock moving near the workers, work has been stopped. Please contact the livestock owner and have him remove the animals from the Site as soon as possible. The Site gates will be open during business hours to allow the livestock owner to enter and remove animals from the Site.

Best Regards,

Dan Gainer, PG CSM
